PCS MINISTRY SCHEDULE

Introducing the PCS Ministry Scheduling Program...

- Quickly manage all ministries and ministry scheduling from one easy-to-use interface
- PCS Ministry Scheduling Programs automatically assigns ministers to appropriate masses based on your specifications
- With PCS, an administrator can define every relevant detail for each minister. Setting a minister's serving-preference for times, days of the week, vacations or for a leave of absence is all done in advance... and schedules are generated accordingly
- Personal preferences of each minister are stored in the PCS database, a feature which is especially beneficial when dealing with families or groups with more than one minister that may wish to serve together. Using PCS Ministry Schedule, you can instantly schedule all members of a household to serve together at the same mass, and publish your ministry schedules on the web for review!

- Generate recurring or special mass schedules which automatically synchronize with minister preferences and availability. Never over-schedule or be left short-handed at mass again!
- With the entire database of ministers at your fingertips you can: add, edit or delete any information relating to a particular minister or ministers in seconds! Also, searching for alternate ministers for a vacancy in one or more time slots is now done for you - in an instant!
- Use the built-in filters and pop-up features to fill openings for each mass. No more phone calls or guesswork. PCS Ministry Scheduling program already knows which ministers are available to serve and works off of the information stored in the database to eliminate all conflicts and stabilize your mass schedules.

- Easily generate, print, email or publish one of countless, ready-to-use reports. Reports can also be customized based on your parish's specific needs.
- Publishing ministry schedules on a parish website makes it easier for ministers to find substitutes or to swap times. The schedule can be regenerated accordingly with ease.
- Envelopes or mailing labels can be printed automatically for mailing schedules or information out to ministers. Address information for each minister can easily be retrieved from the PCS database. This information can be filtered for special mailings.

... The only complete solution for all of your ministry scheduling requirements
