OmniData Product Announcement

Archdiocese of Los Angeles Parish Computer System – PCS NEW PCS Education Feature The VIP Conference - Virtual Individual Parent-Teacher Conference Using PCS Web Access

Providing a quality – effective education at the elementary school level is a shared responsibility between the parents and the school and the teacher. As in any endeavor where responsibility is shared – ongoing coordination – collaboration is required. The better the effort, the better the results.

Traditionally, coordination – collaboration at the elementary school level has been in the form of;

- Students sharing work/test results with parents/guardians
- Back to School Night
- Report Cards
- Individual Parent-Teacher conferences – as required – time permitting

Furthermore, effective parenting requires that the parents extend the learning environment, initiated by the school, into the home environment. The learning environment should not be limited to the 5-hour school day. The learning environment does not end with the school bell; rather the bell signals a change in the learning environment. The learning environment is transitioned from the school to the home. In order to provide this extended learning environment, an ongoing collaborative effort is required on the part of the parent and the teacher; otherwise, the benefits of the extended learning environment are not fully realized.

What is needed is a “real-time” parent-teacher collaborative environment. Where does the teacher get the time to provide this level of coordination – collaboration for each individual student?

The VIP Conference... Virtual Individual Parent-Teacher Conference

OmniData’s “**Virtual Individual Parent-Teacher Conference**” creates this real-time parent-teacher collaborative effort using the Internet. Using the “education” features of OmniData’s PCS System, teachers post class summaries, class goals, individual test results, and homework assignments; the school staff posts attendance records, individual semester grades, tuition fees, and volunteer hours; Using OmniData’s **PCS Web Access** to review this information, which is customized for each individual student, parents then have all of the tools – INFORMATION - to extend the learning environment in a coordinated and collaborative manner.

OmniData’s **VIP Conference** enhances traditional parent-teacher coordination; OmniData’s **VIP Conference** augments traditional parent-teacher collaborative tools for today’s high-tech – high-paced environment. Parents-Teachers can now communicate on a regular – real-time basis. Using OmniData’s **VIP Conference** class goals and test results are immediately shared with parents; Using OmniData’s **VIP Conference** there are enough hours in the day for individual parent-teacher conferences; Using OmniData’s **VIP Conference** the learning environment truly becomes a coordinated extension of the school day. OmniData’s **VIP Conference** provides for a true parent-teacher collaborative effort.

For a real-time demo visit our web site .. <http://www.omnipcs.net/PCS/PCSWebAccess.htm>

PCS is developed by OmniData Corporation;
In coordination with the Archdiocese of Los Angeles.
